

Intelligent Light Commercial DEHUMIDIFIER

DRYER FUNCTION

CONTROLS HUMIDITY

REMOVES MOISTURE

WIDE COVERAGE UP TO 100m²

AIR IONIZER

Input Voltage: 220V
Input Frequency: 60Hz
Rated Power: 695W
Capacity: Up to 60L/day
Water Tank: 8L
Item Size: 420x317x673mm

UP TO 60 liters per day CAPACITY

KHD-660E

✓ **BIGGER CAPACITY** ✓ **WIDER COVERAGE**

FEATURES

APPLICATIONS

Intelligent **DEHUMIDIFIER**

DRYER FUNCTION

CONTROLS HUMIDITY

REMOVES MOISTURE

WIDE COVERAGE UP TO 50m²

AIR IONIZER

Input Voltage: 220V
Input Frequency: 60Hz
Rated Power: 476W
Capacity: Up to 30L/day
Water Tank: 5L
Item Size: 380x230x600mm

UP TO 30 liters per day CAPACITY

KHD-630E

BENEFITS OF A DEHUMIDIFIER:

HOW DOES A DEHUMIDIFIER WORK?

A dehumidifier works by drawing in moist air, passing it over cold coils, causing the moisture to condense into water droplets, which are collected in a tank. The dry air is then released back into the room. This process reduces humidity levels, improves indoor air and occupant comfort.

DID YOU KNOW?

We suffer from high humidity levels **10 out of 12 months in a year**, as the Philippines is surrounded by bodies of water, exposed to high temperatures and a prolonged rainy season.
